

Call for Proposals: Data Symposium on Implementing Malawi's 10-Year Action Plan on Fertilizer and Soil Health

Introduction

The MwAPATA Institute, a well-known indigenous policy think tank, is seeking submissions for a data symposium on the implementation of the Malawi Fertilizer and Soil Health Action Plan. This symposium is a crucial step in identifying existing data that can support the implementation of Malawi's Fertilizer and Soil Health 10-Year Action Plan, as well as identifying data gaps. *Your participation and contributions will significantly impact the successful implementation of the Action Plan.*

Symposium objective

This symposium aims to increase awareness of existing, publicly accessible data and promote knowledge sharing essential for advancing the goals of the country's 10-Year Action Plan. We are inviting all contributions, including but not restricted to those from research institutions, academic bodies, government agencies, or Non-Governmental Organizations (NGOs).

The call

We encourage stakeholders to present available datasets that can assist policymakers and other actors in achieving the objectives outlined in Malawi's 10-Year Action Plan. Submissions regarding data in various formats (e.g., household surveys, spatial databases, observational studies, interpolated mapping, etc.) are welcome. All data must be relevant to supporting decision-making processes aligned with the country's 10-Year Action Plan.

Submit your abstract to info@mwapata.mw

The Malawi Fertiliser and Soil Health 10-Year Action Plan The 10-Year Action Plan is Malawi's blueprint for developing a vibrant fertilizer market that tackles the country's main

fertilizer and soil health challenges. It is based on the continental Action Plan on fertilizer and soil health, which was endorsed by the heads of state and government at the African Fertilizer and Soil Health Summit in Nairobi in May 2024.

Logistics

Accepted presenters will have 20 minutes each to showcase their data, including details on how to access it and its relevance to fertilizer and soil health.

Deadline for Submissions

Proposals must be submitted by 24th September, 2024.

We eagerly anticipate your valuable contributions to ensuring the successful implementation of Malawi's Fertilizer and Soil Health Action Plan.
